

RivTec's Printer Control and Management System for production line printers can be customised to seamlessly integrate with your existing systems. It has the potential to greatly reduce your packaging waste by eliminating the risk of coding and labelling errors.

## Benefits

- Eliminate coding errors by using a central database.
- Reduce waste as a result of incorrectly applied codes.
- Reduce operator workload by removing the need to build the message during product changeovers.
- Improve production line efficiency by simplifying the changeover process.
- Improve product tracking and tracing via in-built transaction logs.
- Improve quality by getting it right first time.
- Improve customer service by eliminating coding errors.
- Reduce costs.

## Industries

- Pharmaceutical
- Dairy
- Food packaging
- Bottling Lines
- Canning Lines
- Bakeries
- Manufacturing

## Specification

- Control and monitor an unlimited number of printers
- Maintains a log of all transactions
- Password restricted access
- Barcode enabled
- Feedback provided to operator at all stages
- Customised to suit client's processes
